**Martindale: The Complete Drug Reference 41st Edition**

Edited by Alison Brayfield and Catherine Cadart

Unbiased, evaluated information on drugs and medicines in use around the world.

It remains the leading international resource, respected for its objectivity, reliability and global coverage, it’s unique offering:

Includes encyclopaedic facts about drugs and medicines:

- Over 6,600 monographs on drugs and ancillary substances
- Over 200,000 preparations
- Over 60,000 references
- Over 25,000 manufacturers and distributors
- Enables identification of medicines, the local equivalent, and the manufacturer
- Covers herbals, diagnostic agents, radiopharmaceuticals, pharmaceutical excipients, toxins, and poisons
- Evidence-based and extensively referenced.

New 41st Edition has been extensively updated and includes over 130 new monographs.

9780857114846 | 4,982 pages | May 2024 | Hardback; 2 volumes | £650.00

**Handbook of Pharmaceutical Excipients Ninth Edition**

Edited by Paul J. Sheskey, Bruno C. Hancock, Gary P. Moss, David J. Goldfarb

Extensive information on the uses and properties of excipients. Including pharmacopeias, patents, manufacturer’s data with grade-specific differences. It brings together global information sources and expert observations. The 400+ monographs are also thoroughly cross-referenced and indexed to allow their identification by chemical, non proprietary or trade names.

9780857113757 | 1,296 pages | October 2020 | Hardback | £430.00
Stockley’s Drug Interactions
Twelfth Edition
Edited by Claire L. Preston

It remains the world’s most comprehensive and authoritative international reference book on drug interactions. Based upon thousands of published papers and reports, it covers interactions between therapeutic drugs, proprietary medicines, herbal medicines, foods, drinks, and drugs of abuse. It provides comprehensive details of the clinical evidence for the interactions under discussion, an assessment of their clinical importance, and clear guidance on managing the interaction in practice. The book includes over 300 new monographs with reviews and updates for the existing 4500 monographs.

9780857113474    |   2,048 pages    |   March 2019    |   Hardback    |   £240.00

Stockley’s Herbal Medicines Interactions
Second Edition
Edited by Elizabeth M. Williamson, Samuel Driver and Karen Baxter

Actionable evidence-based guidance on the interactions of herbal medicines, dietary supplements, and nutraceuticals with conventional medicines. Developed by a team of experts in the fields of drug interactions, clinical herbal medicines, phytopharmacovigilance and regulation of herbal medicinal products. It brings together available data on over 190 of the most commonly used herbal medicines, dietary supplements and nutraceuticals in highly structured, rigorously researched, and fully referenced monographs.

9780857110268    |   528 pages   |   February 2013   |   Hardback    |   £82.50

Clarke’s Analysis of Drugs and Poisons
Fourth Edition
Edited by Anthony C. Moffat, M. David Osselton and Brian Widdop

Clarke’s Analysis of Drugs and Poisons is critical in drug development, clinical cases and forensic investigations, and supports toxicologists in every aspect of their work from drugs and alcohol in driving, to post-mortem toxicology. Written by more than 40 international experts, this reference work has been completely revised and updated.

9780853697114    |   2,736 pages    |   May 2011    |   Hardback    |   £535.00
Workplace Drug Testing
Edited by Alain Verstraete

This comprehensive text provides clear explanations of the effects of drugs on human performance and the need for workplace drug testing. It provides essential information on the regulatory and legal frameworks around the world, how to set policies and coverage of all aspects of drug analysis and the associated interpretation of results. Injectable Drugs Guide
Edited by Alistair Howard Gray, Jane Wright, Vincent Goodey and Lynn Bruce

A guide to the safe and effective administration of injectable drugs. It includes information on: final concentration of reconstituted solutions; stability; periodicity of monitoring; and, unusual electrolyte, glucose and excipients content. It consists of an A-Z of approximately 300 injectable drugs in monograph format and provides a holistic approach to injectable medicines.

9780853697879 | 928 pages | February 2011 | Paperback | £54.00

Handbook of Drug Administration via Enteral Feeding Tubes | Third Edition
Edited by Rebecca White and Vicky Bradnam

This handbook covers the technical, practical, and legal aspects that should be considered before prescribing or administering drugs via enteral feeding tubes. Produced by experts in the field of enteral nutrition on behalf of the British Pharmaceutical Nutrition Group. It includes 29 new monographs and 404 updated monographs and a brand new chapter on medicines optimisation.

978085711623 | 752 pages | March 2015 | Paperback | £56.00
Integrated Pharmacy Case Studies
Edited by Sally-Anne Francis, Felicity J. Smith, John Malkinson, Andrew Constanti and Kevin Taylor

A case study approach to pharmacy education, demonstrating the relevance of pharmaceutical science in practice. This textbook is one of the first to integrate the science of pharmacy with practice. It provides a case study approach to pharmacy education, demonstrating in the most practical way possible the relevance of pharmaceutical science in practice.

9780853698845 | 456 pages | June 2015 | Paperback | £47.00

Introduction to Pharmaceutical Calculations  |  Fourth Edition
Edited by Judith A. Rees, Ian Smith and Jennie Watson

A comprehensive guide to successfully performing pharmaceutical calculations. In its fourth edition, this popular book covers everything you need to know to pass the pharmacy calculation exams. Every chapter contains learning objectives, worked examples and sample questions and has been fully updated. Videos demonstrating calculations concepts are available.

9780857111685 | 288 pages | April 2015 | Paperback | £33.00

Pharmaceutical Calculations Workbook
Edited by Judith A. Rees and Ian Smith

The companion self-study aid to Introduction to Pharmaceutical Calculations. It contains practice calculations (with answers) similar to those encountered in pharmacy exams and in practice. Each chapter contains a variety of exercises for practising calculations using the methods covered in the companion text. Tables for completion are included in addition to individual drug– or patient–specific questions.

9780853696025 | 240 pages | November 2005 | Paperback | £27.00
Biological Therapeutics
Edited by Daniel A. Brook and Ben Greenstein

Biological Therapeutics is an introduction to the treatment of disease using biological medicines derived from living plant and animal tissues. All categories of biological therapeutics are covered in this comprehensive overview.

9780853698432 | 160 pages | January 2011 | Paperback | £33.00

An Introduction to Clinical Pharmaceutics
Edited by Alexander T. Florence

This textbook looks at the importance of pharmaceutics and pharmaceutical dosage form design by considering the clinical use of modern drugs. It includes adverse reactions due to formulations and excipients. It considers the uses and behaviour of dosage forms in different age groups and patient groups along with developments such as personalised therapies and genomics.

9780853696919 | 208 pages | February 2010 | Paperback | £27.00

FASTtrack: Applied Pharmaceutical Practice
Second Edition
Edited by Christopher A. Langley and Dawn Belcher

The second edition has been updated to include revisions to the community pharmacy contract, new advanced community pharmacy services and updated prescription labelling information. It also includes revised worked examples and student questions.

9780857110565 | 208 pages | April 2012 | Paperback | £28.00
Pathology and Therapeutics for Pharmacists
A Basis for Clinical Pharmacy Practice | Third Edition
Edited by Russell J. Greene and Norman D. Harris

An integrated approach to the pathophysiological and pharmacotherapeutic principles underlying the treatment of disease. The textbook has been completely revised and updated to reflect advances in therapeutic practice and in the understanding of many disease states.

9780853696902 | 1,008 pages | February 2008 | Paperback | £54.00

Pharmacy Case Studies
Edited by Soraya Dhillon and Rebekah Raymond

An integral approach to pharmacy via a series of pharmacy cases. It helps students understand the application of therapeutics in clinical practice. It tests knowledge gained within the individual areas of law and ethics, pharmaceutics, pharmacology and pathology by examples, bringing together various areas taught on the degree course.

9780853697244 | 480 pages | February 2009 | Paperback | £33.00

Making Medicines
A Brief History of Pharmacy and Pharmaceuticals
Edited by Stuart Anderson

A concise, chronological discussion of the history of therapeutics and pharmacy from the Egyptians through to the present day.

The book focuses on the discovery and uses of medicines to treat illness through the ages, and the evolving role of the pharmacist. Each chapter illustrates how wider social, political and economic developments have influenced drug development.

A practical textbook that covers all aspects of current pharmacy and medicines law in Ireland. It opens with a detailed account of the historical development of Irish pharmacy and medicines law, and includes the landmark Pharmacy Act of 2007.

ISBN: 9780853698821 | 384 pages | March 2011 | Paperback | £40.00
**BNF for Children (BNFC) 2023–2024**  
Edited by Paediatric Formulary Committee  

The first choice for concise medicines information for children. Practical and evidence-based, BNF for Children (BNFC) is the only child-focused drug formulary in the world that is both independent, and has rigorous, accredited content creation processes. This edition provides up-to-date guidance on prescribing, dispensing, and administering medicines to children, plus legal and professional guidelines.

97808571114631 | 1,316 pages | September 2023 | Paperback | £71.00

**Prescribing Medicines for Children**  
*From drug development to practical administration*  
Edited by Mark Turner, Mike Sharland, Charlotte Baker  

Your guide to delivering safe and effective medicines for children. It covers a broad range of important topics in paediatric therapeutics, ranging from the principles of clinical pharmacology in children through to medication safety and drug development. It is an international title that provides guidance on the principles behind optimal neonatal and paediatric prescribing globally. This book complements British National Formulary for Children (BNFC).

9780857111357 | 619 pages | July 2019 | Paperback | £60.00
Palliative Care Formulary (PCF8) | Eighth Edition
Edited by Andrew Wilcock, Paul Howard and Sarah Charlesworth

Independent, specialist information, grounded in clinical practice.

Palliative Care Formulary (PCF8) provides unrivalled and expert drug information for caring for adult patients facing progressive life-limiting diseases, from diagnosis to end of life care. Rigorously researched information grounded in clinical practice tailored for use in palliative and hospice care settings.

This trusted source goes beyond standard references, providing health professionals with in-depth, practical guidance on drugs and treatment regimens to help improve quality of life. PCF8 also includes several Quick Clinical Guides covering key topics in palliative care and designed for everyday use.

9780857114372 | 976 pages | August 2022 | Paperback | £65.95

Introducing Palliative Care | Sixth Edition
Edited by Andrew Wilcock, Robert Twycross and Claire Stark Toller

The established introductory text for palliative care.

The sixth edition has been fully revised in line with current practice. It is split into four parts to cover essential aspects of palliative care and include essential Palliative Care Formulary containing core information about drugs used in palliative care.

New edition updates include fully revised in line with current practice and Palliative Care Formulary, updated essential Palliative Care Formulary containing core information about drugs used in palliative care and ethics chapter includes an expanded section on medically-assisted dying.

9780857114174 | 416 pages | September 2021 | Paperback | £25.00
Basic Pharmacokinetics | Third Edition
Edited by Sunil S. Jambhekar and Philip J. Breen

Basic Pharmacokinetics provides an understanding of the principles of pharmacokinetics and biopharmaceutics. This book addresses clearly and concisely how these principles can be applied to achieve successful drug therapy. The applications of principles and equations are illustrated with related problem sets and problem solving exercises. This edition has been revised and updated to include new chapters on metabolite pharmacokinetics and pharmacokinetic data fitting; expanded multiple choice questions and true/false questions and questions based on pharmacokinetic profiles.

9780857114471 | 496 pages | April 2024 | Paperback | £54.00

---

Clarke’s Analytical Forensic Toxicology
Second Edition
Edited by Adam Negrusz and Gail Cooper

This book focuses on the collection, extraction and analysis of drugs and poisons that you are most likely to encounter in forensic toxicology. This second edition is fully updated to reflect advances in analytical and forensic toxicology.

9780857110541 | 656 pages | May 2013 | Paperback | £65.00

---

Clinical Pharmacokinetics
Edited by Soraya Dhillon and Andrzej Kostrzewski

A practical guide to the use of pharmacokinetic principles in clinical practice. This book includes over 30 clinical cases with self-study questions and answers presented throughout to bridge the gap between pharmacokinetic concepts and their practical application to individual patients.

9780853695714 | 280 pages | March 2006 | Paperback | £33.00
**Essentials of Pharmaceutical Chemistry Fourth Edition**
Edited by Donald Cairns

An introduction to pharmaceutical chemistry. It provides an understanding of the basic chemistry of drug molecules. Now a core text on many university courses, the book contains numerous worked examples and problems.

9780853699798 | 320 pages | January 2012 | Paperback | £43.00

---

**FASTtrack: Chemistry of Drugs**
Edited by David Barlow and David Mountford

A revision guide on pharmaceutical and medicinal chemistry. This well illustrated book offers an accessible introduction to all the key aspects of organic chemistry, elementary medicinal chemistry, and biochemistry. It includes key points, tips and self-assessment questions.

978085710831 | 272 pages | July 2014 | Paperback | £28.00

---

**FASTtrack: Pharmacology | Second Edition**
Edited by Michael D. Randall, David A. Kendall, and Stephen P.H. Alexander

A brief account of drug action, as a study and revision aid. The authors have generally taken a therapeutic area and considered the major classes of drugs, their actions and, to a limited degree, their uses.

9780857110572 | 288 pages | April 2012 | Paperback | £28.00

---

The Royal Pharmaceutical Society’s Knowledge Business
Drugs in Use | Sixth Edition
Case Studies for Pharmacists and Prescribers
Edited by Linda J. Dodds and Kay M.G. Woods

Drugs in Use helps you bridge the gap between theoretical knowledge about medicines and its practical application to patients. The sixth edition has been extensively revised and includes seven new chapters on atrial fibrillation, chronic asthma, chronic pain, sepsis in adults, sepsis in children, deprescribing and supporting adherence. The use of self-study questions and answers to accompany each case helps to challenge readers to consider the many options often available when drug-therapy decisions are made.

9780857114181 | 710 pages | November 2021 | Paperback | £45.00

FASTtrack Physical Pharmacy
Third Edition
Edited by David Attwood and Alexander T. Florence

A revision guide giving bullet points of basic information on physical pharmacy. This book is derived from the textbook Physiochemical Principles of Pharmacy and is designed to be used alongside it for those revision periods when time is short. It includes learning objectives, self-assessment questions and memory maps to aid with revision.

9780857113900 | 232 pages | September 2020 | Paperback | £28.00

Physicochemical Principles of Pharmacy
In Manufacture, Formulation and Clinical Use
Sixth Edition
Edited by Alexander T. Florence and David Attwood

An established textbook that provides full coverage of the physicochemical principles. This sixth edition covers every aspect of drug properties from the design of dosage forms to their delivery by all routes to sites of action in the body.

9780857111746 | 664 pages | December 2015 | Paperback | £48.00
Remington Education: Pharmaceutics
Edited by Shelley Chambers Fox

This book provides comprehensive, concise coverage of all aspects of pharmaceutics. It covers physico-chemical principles and the importance of designing dosage forms that contain the appropriate dose. The second part applies these formulation principles to the design of dosage forms.

9780857110701  |  560 pages  |  June 2014  |  Paperback  |  £33.00

Remington Education: Physical Pharmacy
Edited by Blaine Templar Smith

A simple, concise view of the concepts and applications of physical pharmacy. It provides a summary of key information in the relevant subject area and including cases and/or questions and answers for self-assessment.

9780857111067  |  192 pages  |  October 2015  |  Paperback  |  £38.00

FASTtrack: Pharmaceutics - Dosage Form and Design  |  Second Edition
Edited by David S. Jones

Essential information concerning the formulation of dosage forms that will aid understanding and remove the complexities of the various topics. This second edition includes a new chapter on pharmaceutical engineering. All chapters have been revised and updated and includes self-assessment questions at the end of each section.

9780857110787  |  432 pages  |  June 2016  |  Paperback  |  £28.00

FASTtrack: Pharmaceutics: Drug Delivery and Targeting  |  Second Edition
Edited by Yvonne Perrie and Thomas Rades

Reviews important concepts and facts for the delivery and targeting of drugs. Relevant examples of drug delivery systems are given with a focus on drug delivery systems that have reached clinical reality. Concise, bulleted information, chapter overviews, hints, key points, mind maps and an self-assessment section which includes MCQs.

9780857110596  |  256 pages  |  June 2012  |  Paperback  |  £28.00
**Sampson’s Textbook of Radiopharmacy**  
*Fourth Edition*  
Edited by Tony Theobald

The fourth edition of this well-established book has been completely revised and updated to reflect developments in the science and practice of radiopharmacy. It is supported by the UK Radiopharmacy Group and includes contributions from experts worldwide. It is the only up-to-date reference that covers the regulation of radiopharmacy practice in the UK, the USA and Europe.

9780853697893 | 744 pages | December 2010 | Hardback | £81.00

---

**Non-medical Prescribing**  
Edited by Mahesh Sodha and Soraya Dhillon

The book provides an overview of non-medical prescribing. It is an indispensable guide to the key areas which consider safe and effective prescribing.

9780853697688 | 240 pages | August 2009 | Paperback | £27.00

---

**Nuclear Pharmacy**  
Edited by Blaine Templar Smith

A comprehensive introduction to nuclear medicine with focus on the application of basic information. It looks at basic nuclear physics, radioactive decay, radiopharmaceuticals, practice of nuclear pharmacy and how to use radiopharmaceuticals.

9780853698661 | 304 pages | February 2010 | Paperback | £33.00

---

**Developing Your Prescribing Skills**  
Edited by Trudy Thomas

Using ‘real life’ case scenarios, it takes a practical view of the main issues facing prescribers. Readers can apply the generic prescribing skills covered in each chapter to their own practice exercises.

9780853698814 | 176 pages | December 2010 | Paperback | £23.00
