

Consultation is a valuable step in the development of BNF + BNFC content

Oral iron for the management of iron-deficiency anaemia in children

Consultation on draft BNFC content – comments table

27 November 2024 – 10 December 2024

Page number(s)	Line number(s)	Comments/Theme	Response
2	9-15	Neonatal dosing reflects our current practice within this trust for prophylaxis dosing for preterm/ small babies.	Thank you for your comment.

Comments received in the course of consultations carried out by the BNF + BNFC Editorial Team are published in the interests of openness and transparency, and to promote understanding of how BNF + BNFC content is developed. The comments are published as a record of the submissions that the Editorial Team has received, and are not endorsed by the BNF + BNFC Editorial Team, its committees, or its advisers.
